SUBJECT: Reformulation / New Can Size – Enfamil EnfaCare LIPIL

Mead Johnson has reformulated Enfamil EnfaCare, a formula for premature infants. It is now called Enfamil EnfaCare LIPIL. This memo is to inform you that the WIN system formula codes and wording for Enfamil EnfaCare description have changed to read EnfaCare or EnfaCare LIPIL on the TX WIN formula codes list.

EnfaCare LIPIL has long-chain polyunsaturated fatty acids (LCPUFA's) docosahexaenoic acid (DHA) and arachidonic acid (ARA) added. These LCPUFA's occur naturally in breast milk and have been shown in some studies to aid in brain development and visual acuity. Otherwise, EnfaCare and EnfaCare LIPIL are the same.

406	EnfaCare or EnfaCare LIPIL-PWD	2ea - 14.3oz -or- 2ea - 12.9oz
407	EnfaCare or EnfaCare LIPIL-PWD	4ea - 14.3oz -or- 4ea - 12.9oz
408	EnfaCare or EnfaCare LIPIL-PWD	8ea - 14.3oz -or- 9ea - 12.9oz
409	EnfaCare or EnfaCare LIPIL-PWD	10ea - 14.3oz -or- 11ea - 12.9oz

Local agencies should see these changes in the WIN system following a successful transfer of data "end of day process" with the state office.
